MobileHCI is now on its 12th Edition. This is the leading conference in the field of Human Computer Interaction with Mobile Devices and Services. The MobileHCI series provides a forum for academics and practitioners to discuss the challenges and potential solutions for effective interaction with mobile systems and services. It covers the design, evaluation and application of techniques and approaches for mobile and wearable computing devices and services.

The conference Proceedings will be published by ACM and indexed by the ACM Digital Library.

### IMPORTANT DATES

Papers submission: **29th January, 2010**  
Workshop submission (organisers): **22nd January, 2010**

### SUGGESTED TOPICS

- Novel user interfaces and interaction techniques
- Mobile social networks
- Context-aware systems
- Perception and modelling of the environment
- Personal assistance with mobile devices
- Multimodal interaction (including audio and speech)
- Group interaction and mobility
- Mobility and work environments
- Mobile accessibility
- Mobile social networks
- Interfaces for mobile communities
- Multi-cultural interaction
- Mobile devices including PDAs, Pocket PCs, WAP phones
- 3G/4G devices and services
- Services for mobile devices
- Wearable computing, smart clothes, new devices and sensors
- Mobile entertainment
- Mobile storytelling and location based gaming
- Mobile art
- Designing Web sites for mobile devices
- Evaluation and usability of mobile devices and services
- User centred design tools and methods for mobile systems
- Ethnographical and field studies with mobile technology
- Model-based design of interactive mobile systems
- Visualization techniques for the mobile context
- Safety issues e.g., in-car user interfaces, payments
- Trust, privacy, content protection, legal aspects & issues in mobile applications
